

Building Station 55 and Adding a Unit to System

Medic 55 will be placed in South Caldwell between Lake Ave and Farmway Rd South of Ustick Rd. As the data below shows, South Caldwell is as an area where there is significant call volume but also lacks adequate coverage to respond in a timely manner. Adding Station 55 will increase the number of ambulances available in Caldwell. This reduces the need for units operating in Nampa or Middleton to respond across the County, which lowers response times within the entire system and maintains appropriate coverage in each community.

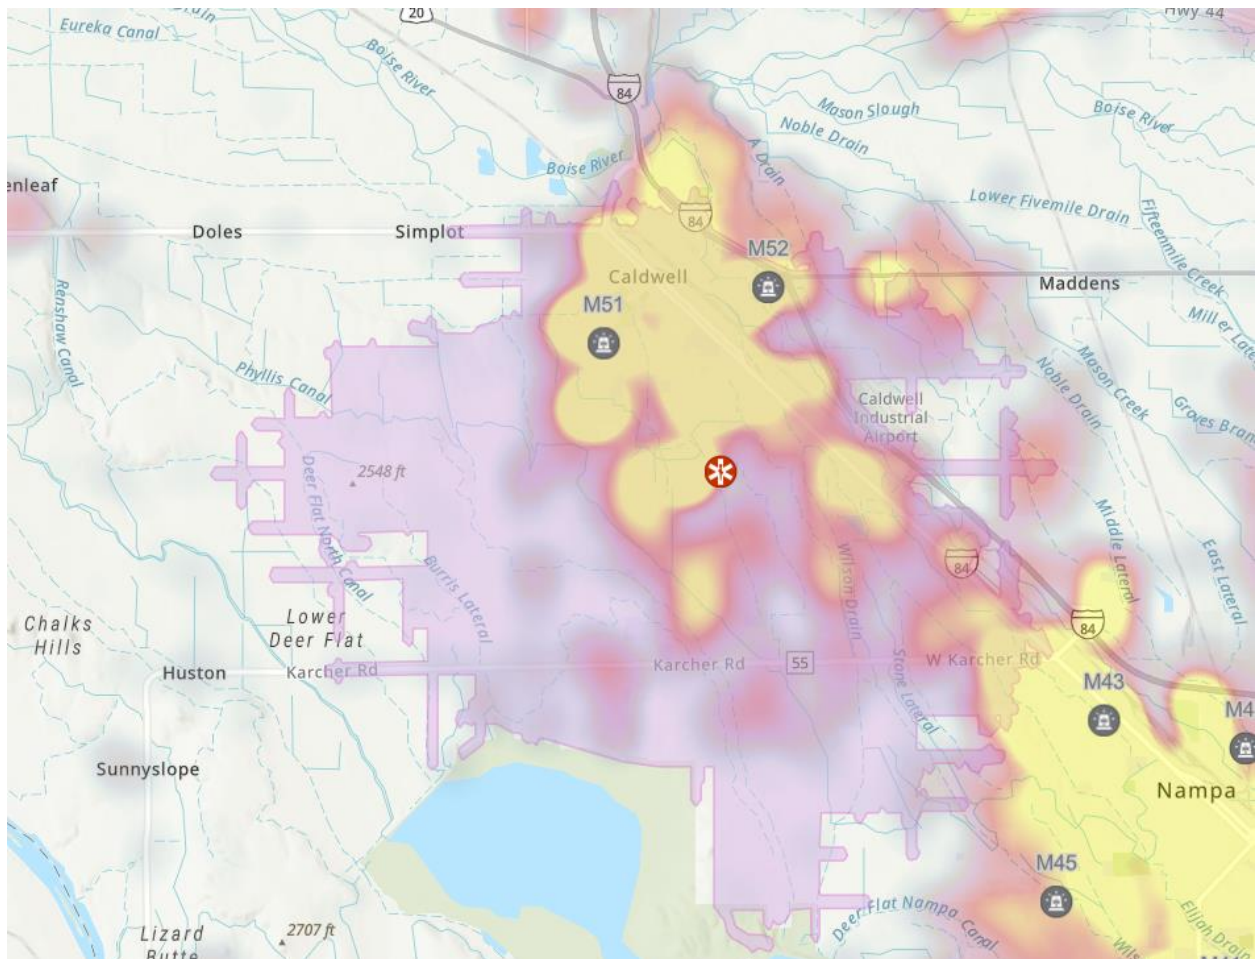

Figure 10: Represents an 8 min response for Medic 55 in its proposed location of Ustick and Indiana. As is demonstrated by the data, Medic 55 would have less than an 8 min response time to the entirety of South Caldwell and West Nampa.
